CE-Symbol gemäß Richtlinie 93/68EWG

The 50W powered speaker is equipped with eight 77mm full-range loudspeaker chassis and a 100V transformer with 4 power adjustments. The powder-coated and shock-resistant aluminium housing in RAL 9006 guarantees long-term stability. For additional reliability, a 2-pin ceramic block, and a thermal fuse is provided and the speaker chassis is impregnated against wetness. Furthermore, sturdy cable glands 2 x PG9 are also provided.

The speaker is also secured with the high protection class IP 66 against the security risks of environmental influences.

The speaker is compliant with the British Standard BS 5839, Part 8.

The easy mounting with the included swivel bracket provides much flexibility for the installation. Special paint of the speaker in 4-digit RAL or NCS colour is available at extra cost.

The ball impact resistance of the sound column can only be guaranteed if a mounting bracket is used (article number 20132684). This can be ordered separately.

ic audio loudspeakers are tested and classified according to the IEC standard 60529 (degree of protection by enclosure) against the penetration of foreign objects and moisture. The classification is conforming to standards through characterization with a fixed code. This code consists of the letters IP (International Protection) followed by two digits. The first digit indicates the degree of protection against dust and the second digit the degree of protection against water. Please note that the testing of the products has been carried out in laboratory conditions which are not always 100% comparable with the conditions of different installation environments. This protection can be reduced due to normal wear and tear depending on the installation environment.

RoHS compliant (2011/65/EU)

The IP rating specified is based on ic audio test results, not on CNBOP-PIB test results. Certification only verifies the minimum requirements for EN54-24 compliance.
